

**BO-P:**  
Arrow keys

# Arrow keys for user-friendly machine operation

Remote panel operation can cause long travel distances, limited visibility, and increased staffing requirements. Direct control at the BO-P provides full visibility, precise movement control, and safer, more efficient maintenance. Upgrade your system with this service-approved retrofit to reduce risks, save time, and maximize productivity.

## Benefits

- No longer any need to walk between the control panel and the machine, which allows faster bale laydown and service
- User-friendly operation directly at the machine

## Field of application

- BO-P

## Technical details

- Additional arrow keys on the BO-P
- The functionality of the control panel remains unchanged
